

SEAT NO. SE-24009

NED UNIVERSITY OF ENGINEERING & TECHNOLOGY
FIRST YEAR (Software)
FALL SEMESTER EXAMINATIONS 2024

Time : 3 Hours

Batch 2024

Dated : 13-DEC-24
Max Marks : 60

Fundamentals of Information Technology - CT-174

Instructions: Attempt all Questions. Make assumptions where necessary. All Questions carry equal marks.

CLO 1: Comprehension

Q1.

- a) Explain six common aspects of modern CPUs that enable us to judge their quality or performance. Discuss each of them in detail.
- b) Explain six Components of Internet in detail.

Q2.

- a) Describe six Components of Network and discuss each of these. Also, describe an evolution of programming languages through writing a short note.
- b) Explain the function of an assembler in assembly language. Explain the effect of efficiency on the programs developed in the assembly language.

Q3.

- a) Explain three aspects of constraint programming? List out three applications in which constraint programming is employed.
- b) Differentiate among ring, star, bus and hybrid topology with the help of diagrams.

CLO 2: Application

Q4.

- a) Illustrate different types of computer networks with the help of diagrams and description.
- b) Apply your knowledge to demonstrate the use of network protocols in the communication of messages over the network.

Q5.

- a) Illustrate the popular network media used for data transmission along with strong justifications.
 - b) Apply the knowledge of techniques used while searching for information through a search engine. Analyze the scenario and illustrate how does a query generated by a user is accomplished.
-
