

NED UNIVERSITY OF ENGINEERING & TECHNOLOGY
FIRST YEAR (SOFTWARE ENGINEERING)
SPRING SEMESTER MIDTERM EXAMINATIONS 2025

TIME: 1.5 hours

MAX MARKS: 20

ACADEMIC READING & WRITING (EA-115)

Note: Attempt all questions in your answer sheets.

Q1. Analyze the ways in which the media portrays technological advancements. Discuss the potential impact of these portrayals on public perception and policy decisions. (250-300 words) [8 marks] CLO-2

Q2. You are researching the impact of social media on adolescent mental health. You have encountered two articles: [5 marks] CLO-1

Article 1 (Excerpt): "A recent study found a correlation between increased social media use and reported feelings of anxiety and depression in teenagers. Participants who spent more than three hours daily on platforms like Instagram and TikTok were significantly more likely to report experiencing negative emotions compared to those who used social media for less than an hour a day. The study suggests a potential link, but further research is needed to determine causality."

Article 2 (Excerpt): "Social media can provide valuable support networks for adolescents, particularly those struggling with social isolation. Online communities can offer a sense of belonging and connection, which can be especially beneficial for marginalized youth. While acknowledging potential risks, many experts emphasize the importance of focusing on strategies to promote healthy social media engagement rather than simply demonizing these platforms."

Task: Analyze the information presented in both articles. Identify *both* explicit and implicit information related to the relationship between social media and adolescent mental health. Then, using this information, answer the following question:

Does social media have a solely negative impact on adolescent mental health? Justify your answer by referencing specific details from both articles and explaining your reasoning.

Q3. The graph and table below give information about water use worldwide and water consumption in two different countries. Summarise the information by selecting and reporting the main features, and make comparisons where relevant. Write at least 150 words

[7 marks]
CLO 3

Country	Population	Arable land	Water consumption per person
Brazil	176 million	26,500 km²	359 m³
Democratic Republic of Congo	5.2 million	100 km²	8 m³
