

ACADEMIC READING & WRITING WEEK 01

Ms Hamna Jafri
Week 1

INTRODUCTION OF COURSE INSTRUCTOR

Ms. Hamna Jafri

hamnajafri@cloud.neduet.edu.pk

Department of English Linguistics and Allied Studies

CLASS RULES

- **No swearing in class/no slang**
- **No arguments with the course instructor or your fellow students**
- **No attendance if more than 15 minutes late in class (unless you have a genuine reason)**
- **Always carry required materials (handouts/ worksheets/ portfolio)**
- **No cellphones unless allowed by the instructor**

CLASS RULES

- **No interruptions during the lecture**
- **Raise hands if you want clarification or have any questions**
- **Always share your feedback with the CR if you want any changes made.**
- **Communicate your questions and queries to the CR as the course instructor will only be in direct contact with him/her**
- **For individual queries, email at hamnajafri@cloud.neduet.edu.pk**

Introduction

This course aims to:

- **develop critical reading skills to comprehend, interpret, and infer using academic texts**
- **enable students to use different strategies involved in the reading and writing processes at several stages**
- **assist students in developing structured and coherent written texts with justified arguments**

CLO & PLO SYSTEM

COURSE LEARNING OUTCOME AND ITS MAPPING WITH PROGRAMME LEARNING OUTCOME

Sr. No.	CLOs	Taxonomy level	Programme learning outcome (PLO)
At the end of the course, the student will be able to:			
1	Comprehend explicit and implicit information in various academic texts using relevant reading strategies.	C2	Communication
2	Compose organized, coherent, and effective texts of various academic genres using writing processes and strategies.	C6	Communication
3	Use paraphrasing, summarizing, and referencing skills to avoid plagiarism.	C3	Communication

THE READING PROCESS

- Activating word meanings
- Understanding sentences
- Making inferences
- Comprehension monitoring
- Understanding text structure

- Letter-sound knowledge
- Accurate word decoding
- Automaticity in decoding

READ THE FOLLOWING

According to a research at Cambridge University, it doesn't matter in what order the letters in a word are, the only important thing is that the first and last letter be at the right place. The rest can be a total mess and you can still read it without problem. This is because the human mind doesn't read every letter by itself, but the word as a whole.

Client: Do you do lemonade?

Me: Do we do... lemonade?

Client: Yes, I was told you do that here.

Me: I'm sorry, this is a graphics and print shop.

Client: I know that. I'm not an idiot.

Me: I'm sorry, I didn't mean to -

Client: Look If you can't lemonade these papers for me then I'll go somewhere else!

Me: Do you mean... laminate?

KEY SKILLS IN ACADEMIC READING

- **Skimming vs. Scanning:**
 - **Skimming:** Read quickly to get the general idea.
 - **Scanning:** Look for specific information (dates, names, key facts).
- **Active Reading:** Highlighting key points, making notes, asking questions.
- **Critical Reading:** Don't just accept everything at face value. Question, analyze, and evaluate what you read.

Types of Academic Texts

Academic texts encompass various forms including research articles, textbooks, essays, and dissertations. Each type serves a distinctive purpose and requires specific reading strategies to effectively extract information and engage with the material.

READING COMPREHENSION SKILLS

Reading comprehension involves understanding, interpreting, and analyzing texts. Skills such as summarizing, identifying the main argument, and recognizing the author's purpose are crucial for students to synthesize information and engage critically with academic material.

ANNOTATING TEXTS

Annotating involves taking notes directly on a text, which facilitates deeper understanding and retention. Effective annotations include summarizing key points, marking unfamiliar terms, and noting questions or insights that arise during reading.

ACADEMIC TONE AND STYLE

Maintaining a formal tone in academic writing is essential. The use of precise language, avoidance of colloquialisms, and adherence to a specific citation style contribute to the professionalism of scholarly work.

USING SOURCES IN ACADEMIC WRITING

- **Quoting: Using the exact words from a source.**
- **Paraphrasing: Rewriting the idea in your own words.**
- **Citing: Giving credit to the original author.**

EXAMPLES

● Quoting:

"As Shakespeare once said, 'To quote or not to quote, that is the question.'"

● Paraphrasing:

"Shakespeare asked if it was better to use someone else's words or just say your own."

● Citing:

Citing: "Source: Shakespeare, W. (1609). Hamlet, Act 3, Scene 1."

CONDUCTING RESEARCH EFFECTIVELY

Begin with a clear research question to guide your investigation. Utilize academic databases like JSTOR or Google Scholar to find relevant studies and articles that align with your topic.

AVOIDING PLAGIARISM

Plagiarism can have severe academic consequences. Always credit original authors, and familiarize yourself with your institution's plagiarism policy to understand the boundaries.

QUESTIONS

- **When you're reading an academic article or textbook, what's the first thing you do to understand it better?**
- **Have you ever read something more than once, just to make sure you get the message right?**
- **How do you typically organize your ideas when you start writing an essay?**

QUESTIONS

If you could write a paper on any topic, no matter how weird, what would it be about?

Have you ever read something so confusing in an academic text that you had to laugh? What was it?

THANK YOU
