

Subject: Software Engineering (SE-207)

MIDTERM

Dated: 24-02-2025

- 1 Q#1. Demonstrate your understanding of Extreme Programming by describing its 12 key practices [06]CLO2
- 2 Q#2 Outline Software Requirement Engineering Process, with short description of each stage. Discuss some of the problems that occur when requirements must be elicited from three or four different customers (in-bullet points). [06]CLO1
- Q#3 Compare and contrast agile communication with traditional software engineering communication, highlighting their key differences and similarities [03] CLO2
- Q#4. Justify why incremental development is the most effective approach for developing business software systems and why is this model less appropriate for real-time systems engineering? Also provide example of software project that would be amenable to the incremental model. Be specific. [05]CLO4
