Subject: Application for Junior Software Developer Position

Dear Hiring Manager,

I am writing with great enthusiasm to apply for the Junior Software Developer position at Global Hunterstech Technologies, as advertised. As a recent Software Engineering student with a proven track record in building full-scale applications and effectively presenting them to stakeholders, I am confident that my blend of technical skills and practical experience aligns perfectly with the specific duties you have outlined.

My passion for software development is demonstrated through my project work. For instance, I co-founded and developed **KitabiBuddy**, an AI-powered book listing app. A critical challenge was integrating the Google AI for cover scanning reliably. Through methodical **debugging** and iterating on the API calls and error handling in **JavaScript** and **React Native**, I successfully automated the book listing process, creating a robust and user-friendly core feature. This experience solidified my skills in **troubleshooting** complex problems and delivering functional solutions.

I am particularly drawn to Global Hunterstech because of your emphasis on a "Think Positive" mindset and the opportunity for developers to be involved in the full lifecycle, including **presenting products to clients**. Having successfully pitched my own startup to a panel at NIC Karachi, I am not only comfortable but also eager to communicate technical concepts clearly and persuasively to clients, ensuring they understand the value of the software we build.

I am excited by the prospect of contributing to your team by leveraging my skills in **React Native, JavaScript, Python, and UI/UX design** to support both development and client-facing goals. I am a quick learner, a collaborative team player, and eager to contribute to a positive and innovative work environment.

Thank you for considering my application. My resume is attached for your review, and I look forward to the possibility of discussing how I can contribute to Global Hunterstech Technologies.

Sincerely,

Raazia Imran Reshamwala
