Internal Communication

Internal communication

Internal communication with: Superiors, coworkers, subordinates

Internal Communication

Different employees and officials in an organization need to communicate to each other.

This internal communication with its importance is shown in the following way:

1. Setting goals and Objectives:-

Mostly, the organizations have a variety of formal and informal objectives to accomplish.

These objectives may be financial results, product quality, market dominance, employees satisfaction, or service to customers. So the communication enables all the persons in an organization to work towards a common purpose.

Internal Communication

2. Making and Implementing decision:-

In order to achieve the objective, people in a business organization collect facts and evaluate alternatives, and they do so by reading, asking questions, talking or by plain thinking. These thoughts are put into a written form. Once a decision has been made, it has to be implemented which requires communication.

Internal Communication

3. Appraisal:-

Having implemented the decision, management needs to determine whether the desired outcome is being achieved. Statistics on such factors as cost, sales, market share, productivity and inventory levels are compiled. This is done through computers, manual papers, memos or reports.

4. Manufacturing the products:-

Getting an idea for a new product out of someone's head, pushing it through the production process and finally getting the product also require communication. Designing the plan regarding product, introducing the workers, purchasing raw material, marketing and distributing the product all require effective communication.

External communication

EXTERNAL Communication

External Communication

1. Hiring the employees:-

If a company wants to hire some one, it advertises the vacancy, receives applications, calls the candidates, takes the interview and then offers job to the successful candidates. The whole process requires communication.

2. Dealing with customers:-

Sales letters and brochures, advertisements, personal sales calls, and formal proposals are all used to stimulate the customer's interest. Communication also plays a part in such customer related functions as credit checking, billing, and handling complaints and questions.

3. Negotiating with suppliers and financiers:-

To obtain necessary supplies and services, companies develop written specification that outlines their requirement. Similarly, to arrange finance, they negotiate with lenders and fill out loan applications.

External Communication

4. Informing the investors:-

Balance sheet, income statement, and ratio analysis are used to inform the investors regarding performance of business.

5. Interacting with Govt.:-

Government agencies make certain rules to regulate the economy. These rules are communicated to organizations through various papers. These organizations try to fulfill, these requirement like filling taxation form and other documents.

Feedback Messages

Feedback tells the speaker what affect s/he is having on the listener(s).

On the basis of this feedback the speaker may adjust the message by strengthening, de-emphasizing, or changing the content or form of the message.

The process is cyclical, with one person's feedback serving as the stimulus for the other person's feedback message.

Dimensions of Feedback

Feedback can be looked upon in terms of five dimensions:

1. Positive – Negative

2. Person Focused and Message – Focused

3. Immediate – delayed

4. Low monitoring - High monitoring

5. Supportive - Critical

Dimensions of Feedback

1. Positive - Negative: positive feedback (applause, smiles, and head nods signifying approval) tells the speaker that the message is **being well received**.

Negative feedback (boos, frowns, puzzled looks and gestures signifying disapproval) tells the speaker that **something is wrong and that some adjustments need to be made**.

Dimensions of Feedback

2. Person Focused and Message - Focused:

feedback may concentrate on a person (**you're sweet, you have a great smile**) or on message (**can you repeat? your argument is a good one**).

3. Immediate - delayed:

in interpersonal communication, feedback is immediate (**appreciating a presenter after his presentation**).

In other situations, however feedback may be delayed (writing an email to a guest speaker conveying the audience's feedback).

Dimensions of Feedback

4. Low monitoring - High monitoring:

feedback varies from the spontaneous and totally honest reaction (low monitored feedback) to the carefully constructed response designed to serve a specific purpose (high monitored feedback).

5. Supportive - Critical:

supportive feedback confirms the person and what that person says; it occurs when, for example, you console or encourage others. Critical feedback, on the other hand, is evaluative. Critical feedback is when someone is judging another's performances.

How To Give Constructive Feedback At Work

TYPES OF FEEDBACK

1. Constructive Feedback

Sometimes called *constructive criticism*, focuses on the process and outcomes of communication, not on the people involved

2. Destructive Feedback

delivers criticism with no effort to stimulate improvement

SUGGESTION: When giving feedback, avoid personal attacks and give the person clear guidelines for improvement.

CONSTRUCTIVE FEEDBACK

TABLE 1.1 Giving Constructive Feedback

HOW TO BE CONSTRUCTIVE	EXPLANATION
Think through your suggested changes carefully.	Because many business documents must illustrate complex relationships between ideas and other information, isolated and superficial edits can do more harm than good.
Discuss improvements rather than flaws.	Instead of saying “this is confusing,” explain how the writing can be improved to make it clearer.
Focus on controllable behavior.	Because the writer may not have control over every variable that affected the quality of the message, focus on those aspects the writer can control.
Be specific.	Comments such as “I don’t get this” or “Make this clearer” don’t identify what the writer needs to fix.
Keep feedback impersonal.	Focus comments on the message, not the person who created it.
Verify understanding.	Ask for confirmation from the recipient to make sure that the person understood your feedback.
Time your feedback carefully.	Make sure the writer will have sufficient time to implement the changes you suggest.
Highlight any limitations your feedback may have.	If you didn’t have time to give the document a thorough edit, or if you’re not an expert in some aspect of the content, let the writer know so that he or she can handle your comments appropriately.

Considerations in Feedback

Considerations in **sending** feedback effectively:

- Immediateness
- Honesty
- Appropriateness
- Clarity
- Informative value

Considerations in Feedback

Considerations in **receiving** feedback effectively:

- Sensitivity
- Supportiveness
- Open-mindedness
- Helpfulness

Give Constructive Feedback

Give Constructive Feedback

Brooks & Kirk

1. Begin with some positive comments regarding the situation in question
2. Give praise for the persons strong points
3. Give the criticism
4. Remind the person of their strong points
5. Offer suport in the areas for improvement and leave on a positive note

How To Give Constructive Criticism

FEEDBACK ACTIVITY

Write five constructive and five destructive responses in your learning experiences
