

Task 1

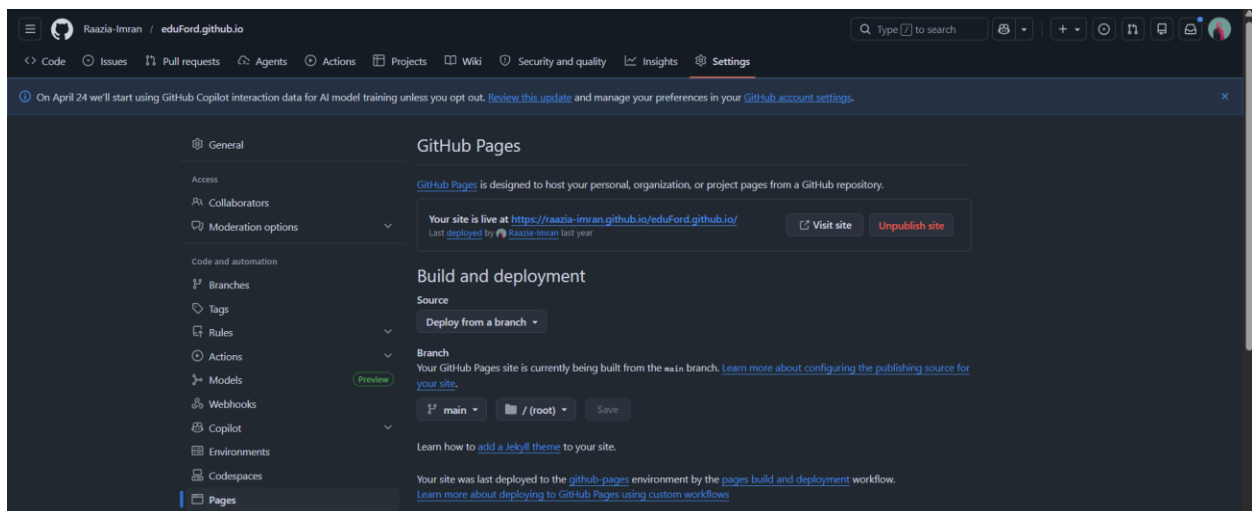

Students are required to take an existing static website project containing HTML, CSS, and related assets and deploy it online using GitHub and its hosting service GitHubPages. After successful deployment, perform a maintenance activity by modifying some part of the website (such as updating text, changing images, or adding a small section) and upload the updated files to the repository so that the deployed website reflects the changes.

Students must submit the following:

1. GitHub Repository Link

<https://github.com/Raazia-Imran/eduFord.github.io>

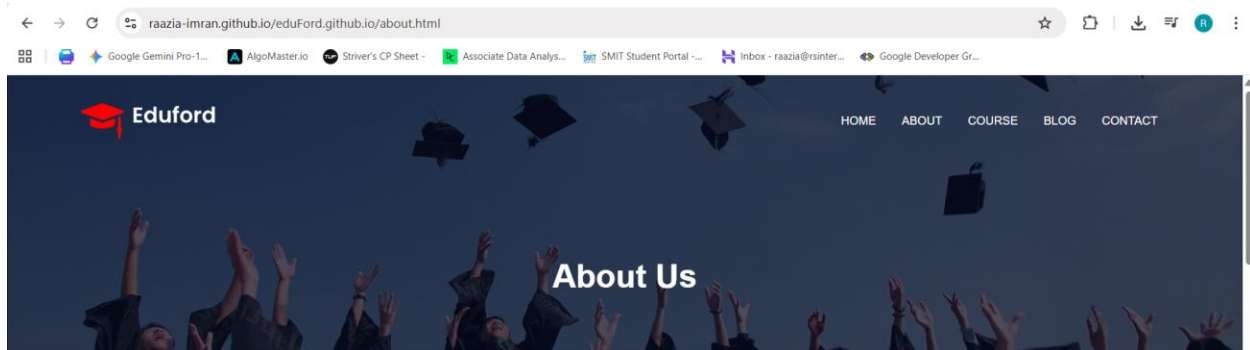

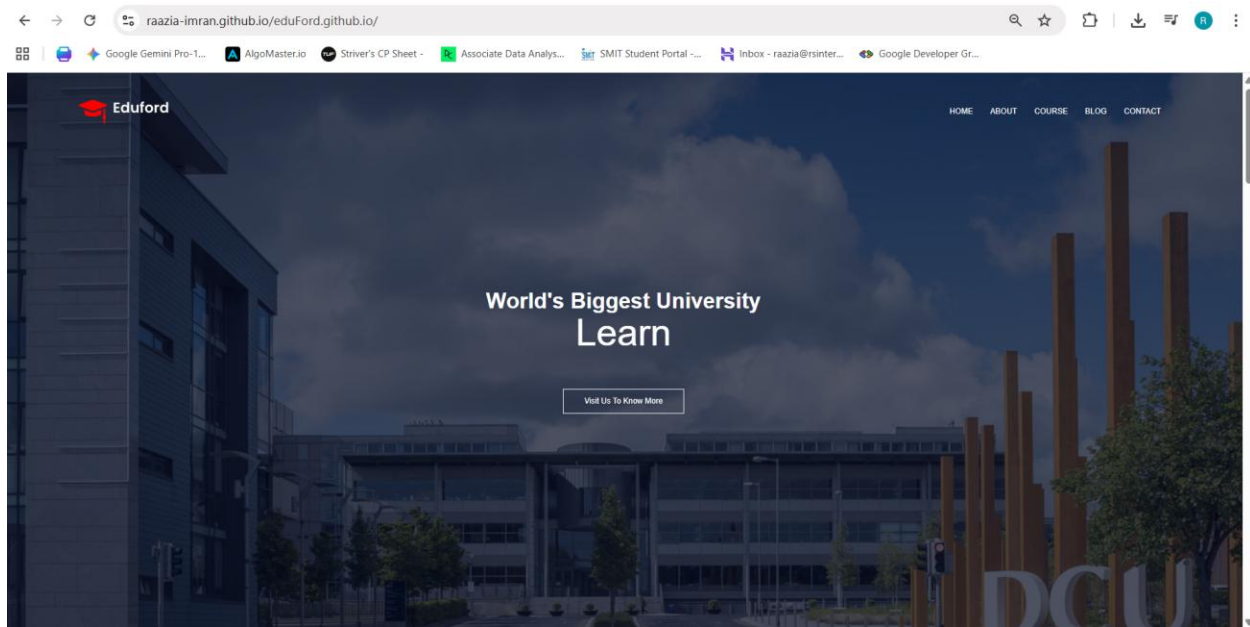

- Clone the repository: `git clone https://github.com/yourusername/eduford.git`

2. Live Website URL

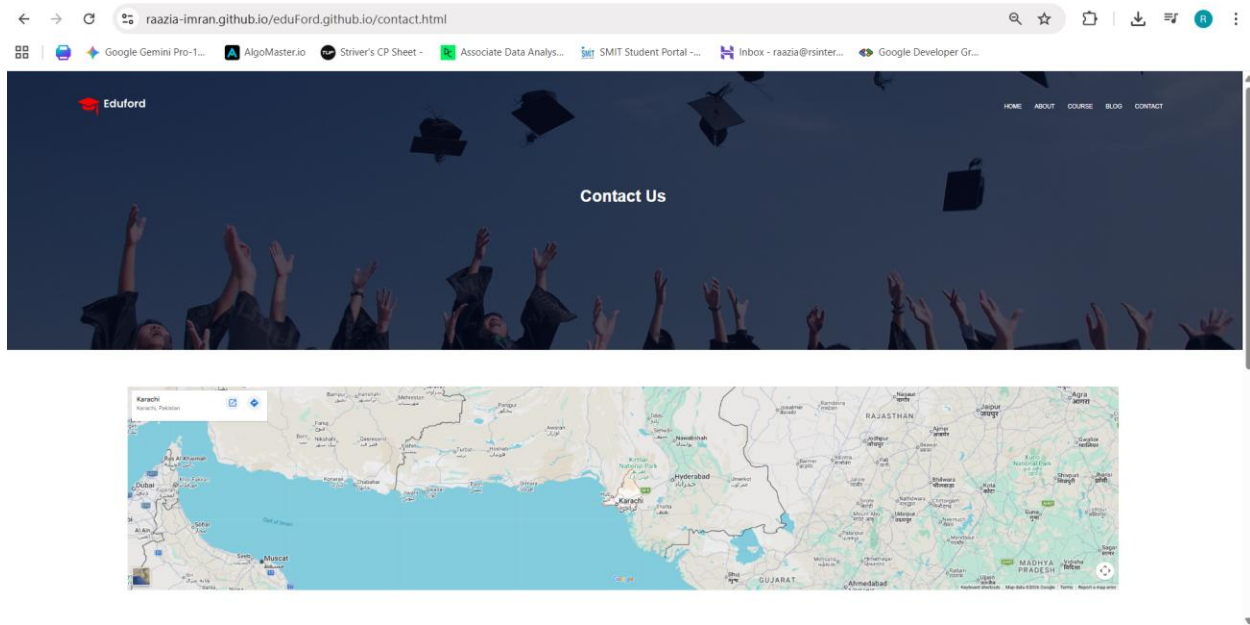

Your site is live at <https://raazia-imran.github.io/eduFord.github.io/>

3. Screenshot of the deployed website

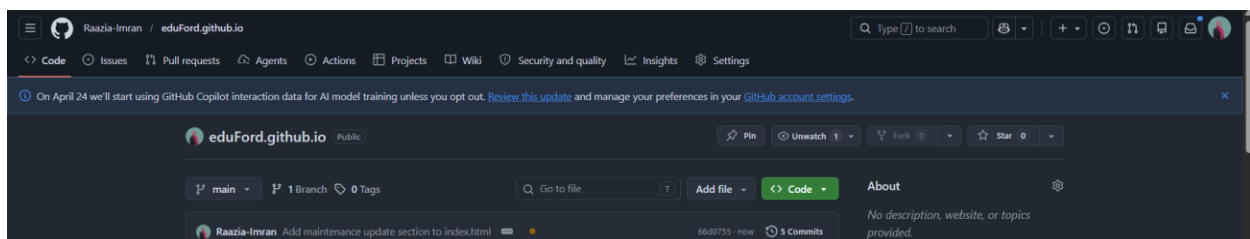

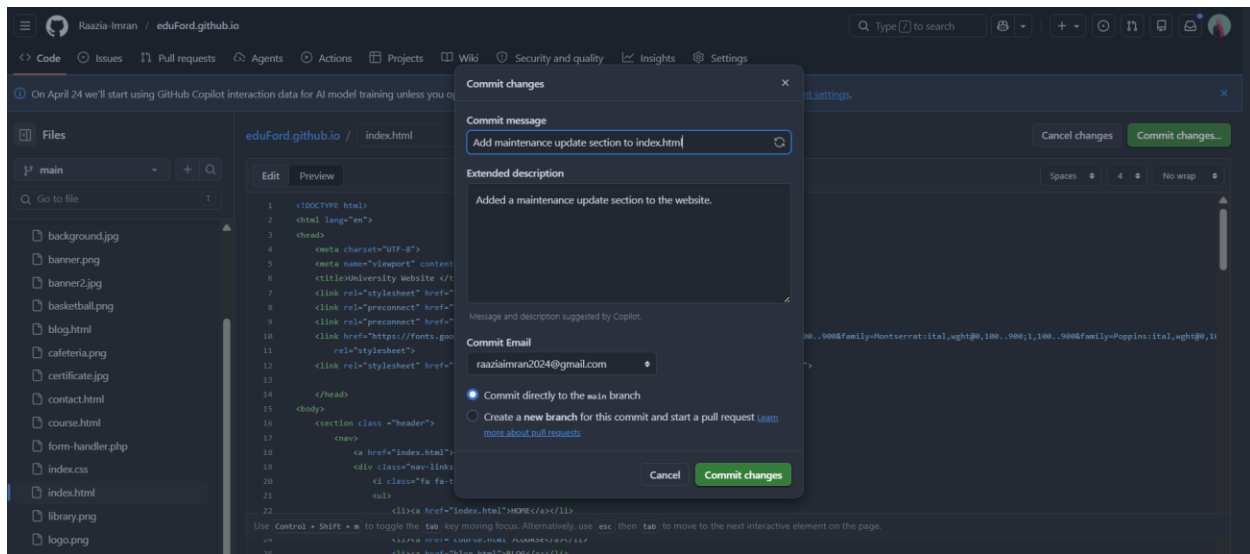

We are the world's leading education institute

Our mission is to provide quality education to students from all over the world. We believe that education is the key to success and we strive to provide the best possible education to our students.
